

## Customer Support or Maintenance

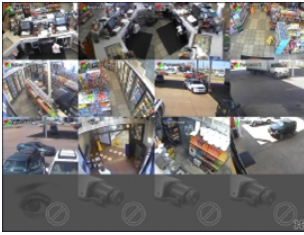

### Customer Support or Maintenance

Before

&

After

Our clients often choose us to clean up their existing systems, as we value great views, clean work and properly configured technology.

This includes re-configuring existing cameras for better images that actually capture evidence (actions, faces, products, vehicles, etc...); securing networks to protect against hackers; and organizing and/or hiding wires.

In addition, we help our clients decipher what equipment needs repaired or replaced for the system to perform properly.

If you need your existing video system, cameras or network reconfigured, contact us at [Assessment@eprocessllc.com](mailto:Assessment@eprocessllc.com) or 219-841-7908.
